## AREARAE PLUS & PRO

Distributed by All Safe Industries - Call 888-972-3389

**Honeywell**

# RAE Systems Area Monitoring Products today

**AreaRAE introduced wireless gas detection and changed the market in fire and hazmat response operations**

*AreaRAE Plastic*

*AreaRAE Steel, Inert and Gamma*

- First Introduced In 2001 and adopted by hazmat teams at the SLC winter Olympics
- Allowed for real time hazard monitoring from a remote location
- Monitored a broad range of threats
  
- Sensor Technology Has Advanced
- New Wireless Options
- Customers Asking For New Improvements

**First Rapidly Deployable Wireless Area Threat Monitor**

# Next Generation of Area Monitoring

Honeywell AreaRAE Plus and Pro carries on that legacy and incorporates 15 years of in service experience to deliver expanded features and capabilities required by the new challenges faced by our customers.

AreaRAE Plus  
Honeywell

- ppm PID
- RAEMet optional
- No Gamma

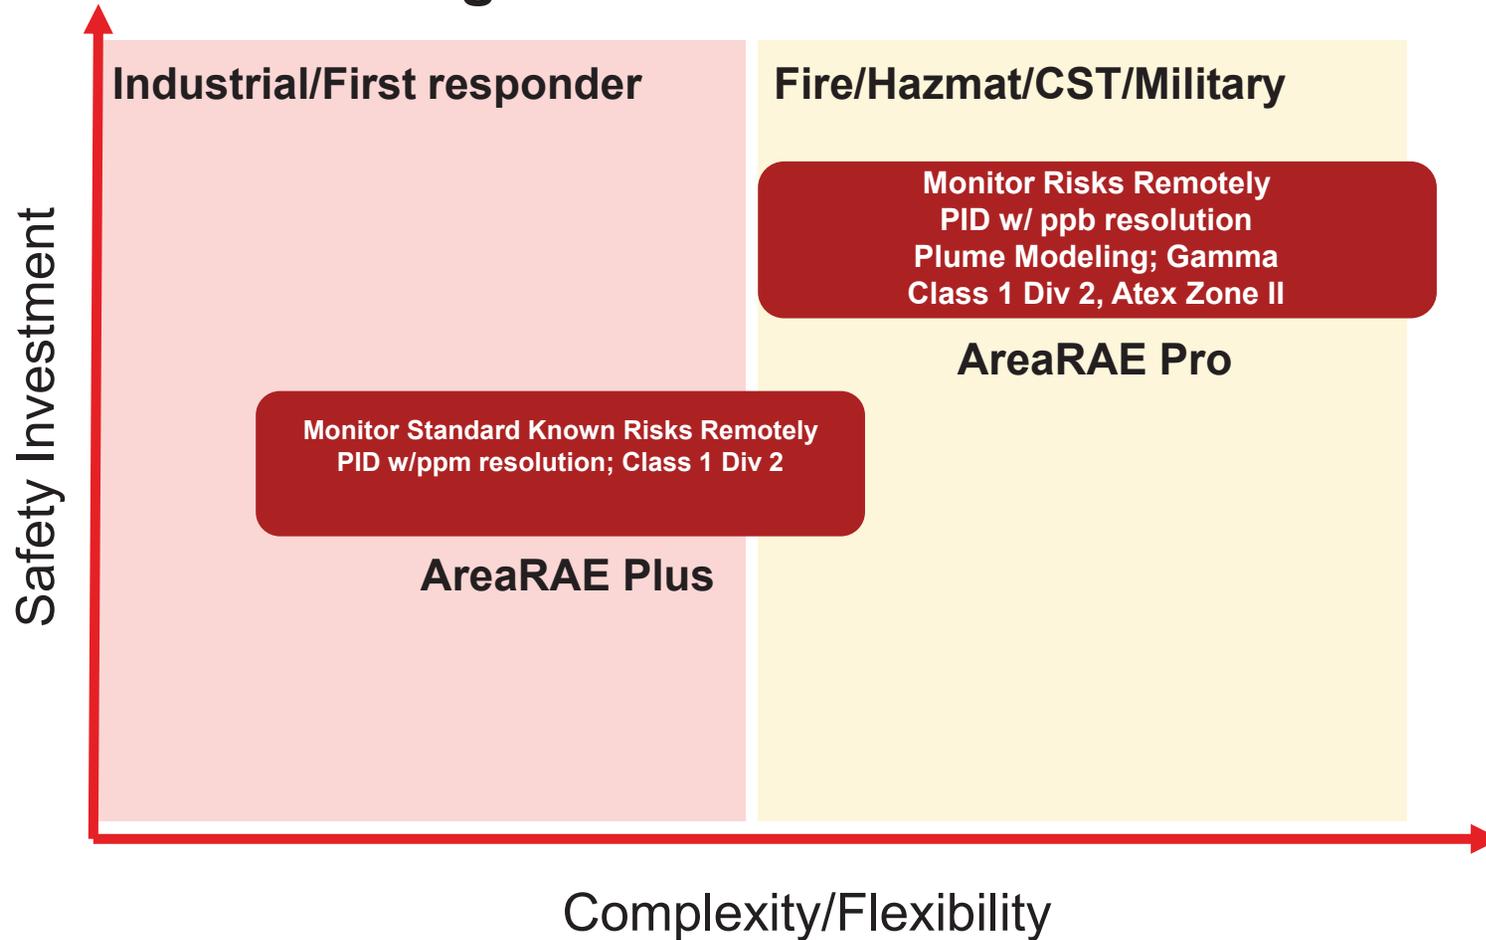

AreaRAE PRO  
Honeywell

- ppb PID
- RAEMet
- Gamma optional

**Built On Our Legacy and In-Field Experience**

# Market Positioning

AreaRAE PRO  
Honeywell

Plus and Pro Meet the Needs of Low and High End Detection

# An Overview of AreaRAE Plus / Pro

## Summary

The most advanced wireless Transportable Local Area Monitor on the market.  
*Complexity has never been this simple!*

## Key differentiators

- All-in-one gas, radiation, ppb level VOC and meteorological detector
- Multiple options for monitoring threats from a remote location
- RAEMet sensor for meteorological measurements and plume modeling
- Easy to deploy, use and service

## Communications

- Up to 4 on-board Wireless modules in same unit
  - Primary radio module (ISM and/ or Wi-Fi)
  - Secondary Mesh radio module
  - Standard GPS
  - BLE\*

## Sensing technologies

- Multiple sensing technologies in one product
  - PID, EC, Combustible, Gamma, Meteorological & GPS
  - More than 25 sensors types to choose
  - Up to 12 sensors in same unit (**7 gas sensors**)

## Certifications

- All major IS certifications (CSA C1 Div 2, ATEX/IECEX Zone II)
- All major Wireless approvals (FCC/IC, R&TTE)
- Designed and tested with MIL STD 810G and 461F

Flexible and Versatile with Advanced Communications

# Sensing Technologies

## Sensors

- 7 sensor slots
  - Increased # of threats monitored
  - 7R+ format opens extra 4R+ slot
  - Better temp and humidity compensation for linearity/accuracy
- Improved PID
  - 10ppb resolution
  - 2 year warranty on lamp
- 4R+ EC sensor
  - Uses existing proven sensor (MultiRAE and ToxiRAE Pro Series)
  - Reduce inventory level for Partners & End customers
  - Supported by SensorRAE 4R+
- New Gas Plate
  - Enables 4R+ HF and HCL sensors

## RAEMet

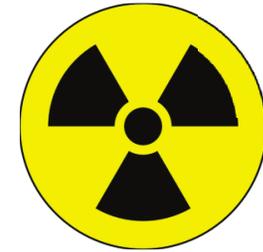

Easy to use meteorological data capturing sensor makes it easy to input weather information in to plume modeling software.

- Measures meteorological parameters
- Wind speed / direction
  - Temperature And Relative humidity

Key benefits:

- High Sensitivity: 0.1m/s & Quick response time: 1s
- Built-in electronic compass
- Factory calibration
- Low maintenance & Service support cost
- Power supply by the AREARAE unit

## Gamma Sensor

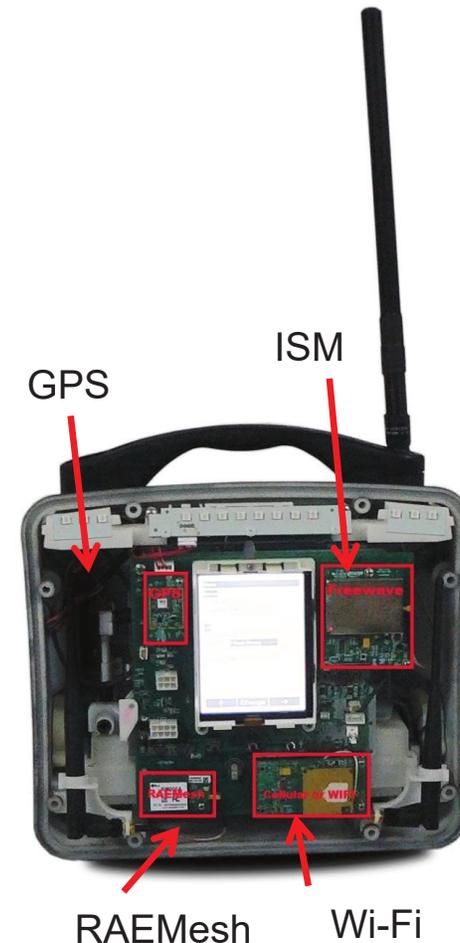

- Can detect much lower levels and higher counts of gamma radiation.  
1-200  $\mu\text{Sv/hr}$  range  
resolution  $>20\text{cps}(\mu\text{Sv/hr})$
- Important for the detection of dirty bombs.

**Additional And More Accessible Sensor Options**

# Improved Connectivity

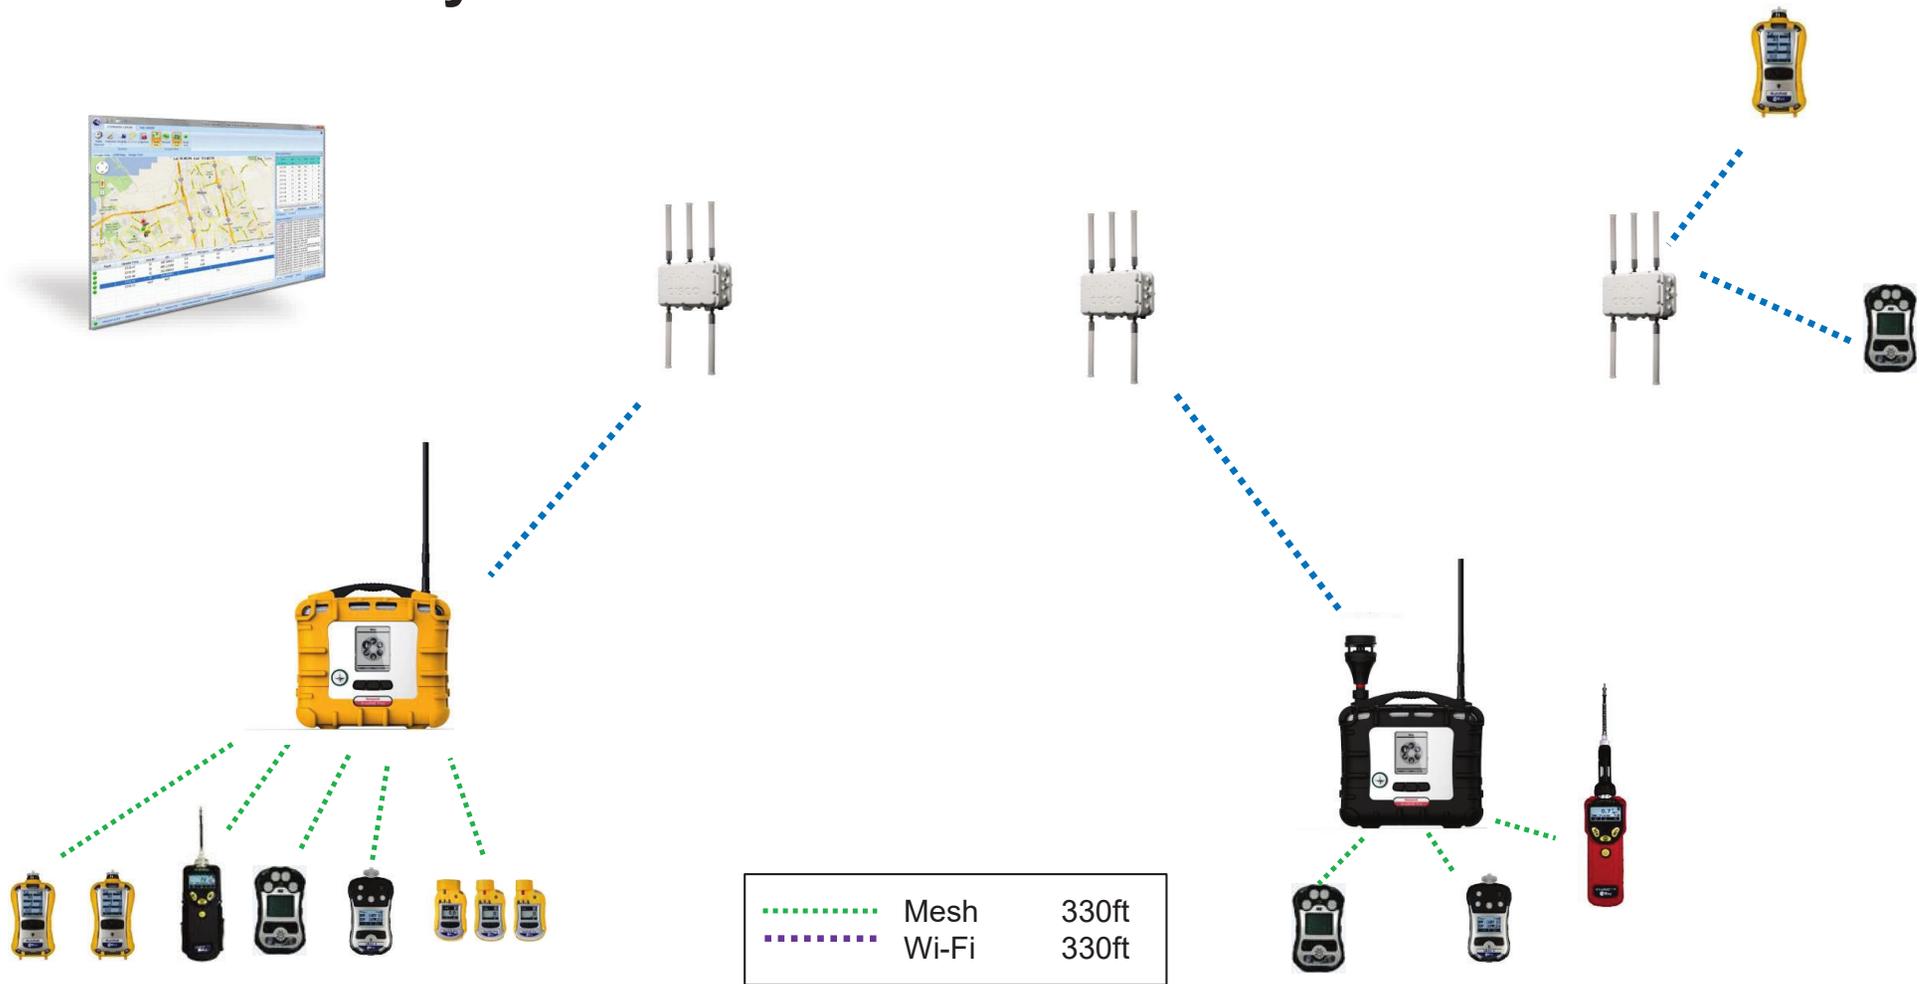

- Integrated standard GPS module
  - (down to 5 -10m accuracy)
- Long Distance **Primary** Radio (only 1 active at given time)
  - ISM license free
    - 900 MHz Line of Sight up to 2 miles (~ 3.2 km)
    - 2.4GHz Line of Sight up to 1.2 miles (~ 2 km)
  - Wi-Fi radio module to connect long-distance via Wi-Fi backhaul
- Short Range Mesh **Secondary** Radio
  - Mesh (900MHz / 868 MHz)
    - RAE Systems by HON proprietary
    - Line of Sight ~ 330ft (~100m)
  - Acts as a **“wireless HUB”** for up to 8 Mesh Portable devices
- Bluetooth® Low Energy (BLE) Module
  - Over the air configuration (Future Release) – Part of Mobile Roadmap

**1<sup>st</sup> product Series to support up to 4 radio modules simultaneously**

# Wireless Ecosystem Wi-Fi

Distributed by All Safe Industries - Call 888-972-3389

# Improved Usability

Distributed by All Safe Industries - Call 888-972-3389

# Improved Product Design

- Rugged Design:
  - Durable shock absorbing colored rubber boots with integrated feet
  - Third Party test IP 65 Rating
  - Pass Shock / Vibration / Drop tests 3<sup>rd</sup> party test @ CSA
  
- Improved Alarm Notification
  - Ultra Bright 360-Degree-view LED (RED and GREEN)
  - “Around the product” 108dB @1m Audible Alarm
  
- Low- Power Consumption

	Charging time	Running time
Rechargeable Li-Ion	Spec:<12 hours ≈ 9h @ room temperature	“Fully loaded” configuration (γ + 7gas sensors + RAEmet + GPS+ wireless) Spec: 16h (@ room temp.      ≈ 15h @ -20°C ≈ 21h @ room temp.
Alkaline Battery pack	NA	“Fully loaded” configuration (γ + 7gas sensors + RAEmet + GPS+ wireless) Spec: 10h (@ room temp.      ≈ 2h @ 0°C ≈ 12h @ room temp.

Distributed by All Safe Industries - Call 888-972-3389

# Designed for Improved Serviceability and Maintenance

>50 – 70 % time savings over following existing procedures:

- Battery pack replacement
  - Gas plate removal
  - Pump Cleaning / Replacement
  - Access/ Replace gas Sensors
  - PID cleaning operation (7R+)
- 
- RAEMet installation: No tools required; factory calibrated
  - No specific gas plate for exotic sensors (HF/ HCL)
  - Fully interchangeable with 4R+ Sensor (MultiRAE and ToxiRAE Pro Series)
  - Detailed diagnostic mode on large screen
  - Glance Mode feature
